

LOBADUR®

Amberizer

Additive

Bestow your dark wooden floor a warm amber look

Rounding off the colouring and enhancing the depth effect

LOBADUR Amberizer and finishes: Trust this combination if you want to bestow dark wood floors a warm touch and more depth effect while achieving optimal, safe and long-lasting protection.

LOBA – your partner for surfaces finishing and care

Why end customers are convinced by Amberizer:

- Uniform effect on the surface
- Waterborne technology, does not contain solvents
- Individual design options
- Multi-layer application possible
- Can be combined with water-bourne LOBADUR primers and finishes

Why processors are excited about Amberizer:

- Versatile use
- Variable control of intensity
- Safe mixing
- Optimally suited for the refurbishment of floorings
- Easy application using rollers

Special feature

Increase the brilliance and colour intensity of wood surfaces. Mix, apply and be amazed!

Range of use

Whether old parquet or new wooden flooring: Amberizer is versatile and can be optimally combined with the water-bourne LOBADUR primers and finishes. Especially recommended for dark woods.

Application

	light ambering	medium ambering		strong ambering
2. Coat			✓	✓
1. Coat		✓	✓	✓
Primer	✓	✓		✓

- Shake Amberizer and primer or finish well.
- Only add Amberizer immediately prior to application, using maximum one container (1 x 100 g) for 5 l/kg
- Shake or stir thoroughly following addition of Amberizer (e.g. mechanically using a LOBATOOL paint mixer)
For 2-component systems, Amberizer is only added once the hardener has been worked into the putty
- Putty mixed with Amberizer must be processed within 24 hours, and 2-component systems within the specified processing time.
